**BEVCO, WATERLIE E AMG PLASTIK FANNO PARTE DELLO STESSO GRUPPO:
TRE AZIENDE LEGATE DA UNA COMPETENZA CONDIVISA
E DA UNA VISIONE COMUNE DEL FUTURO.**

BEVCO , WATERLINE AND AMG PLASTIK ARE PART OF THE SAME GROUP:

L'AZIENDA
THE COMPANY

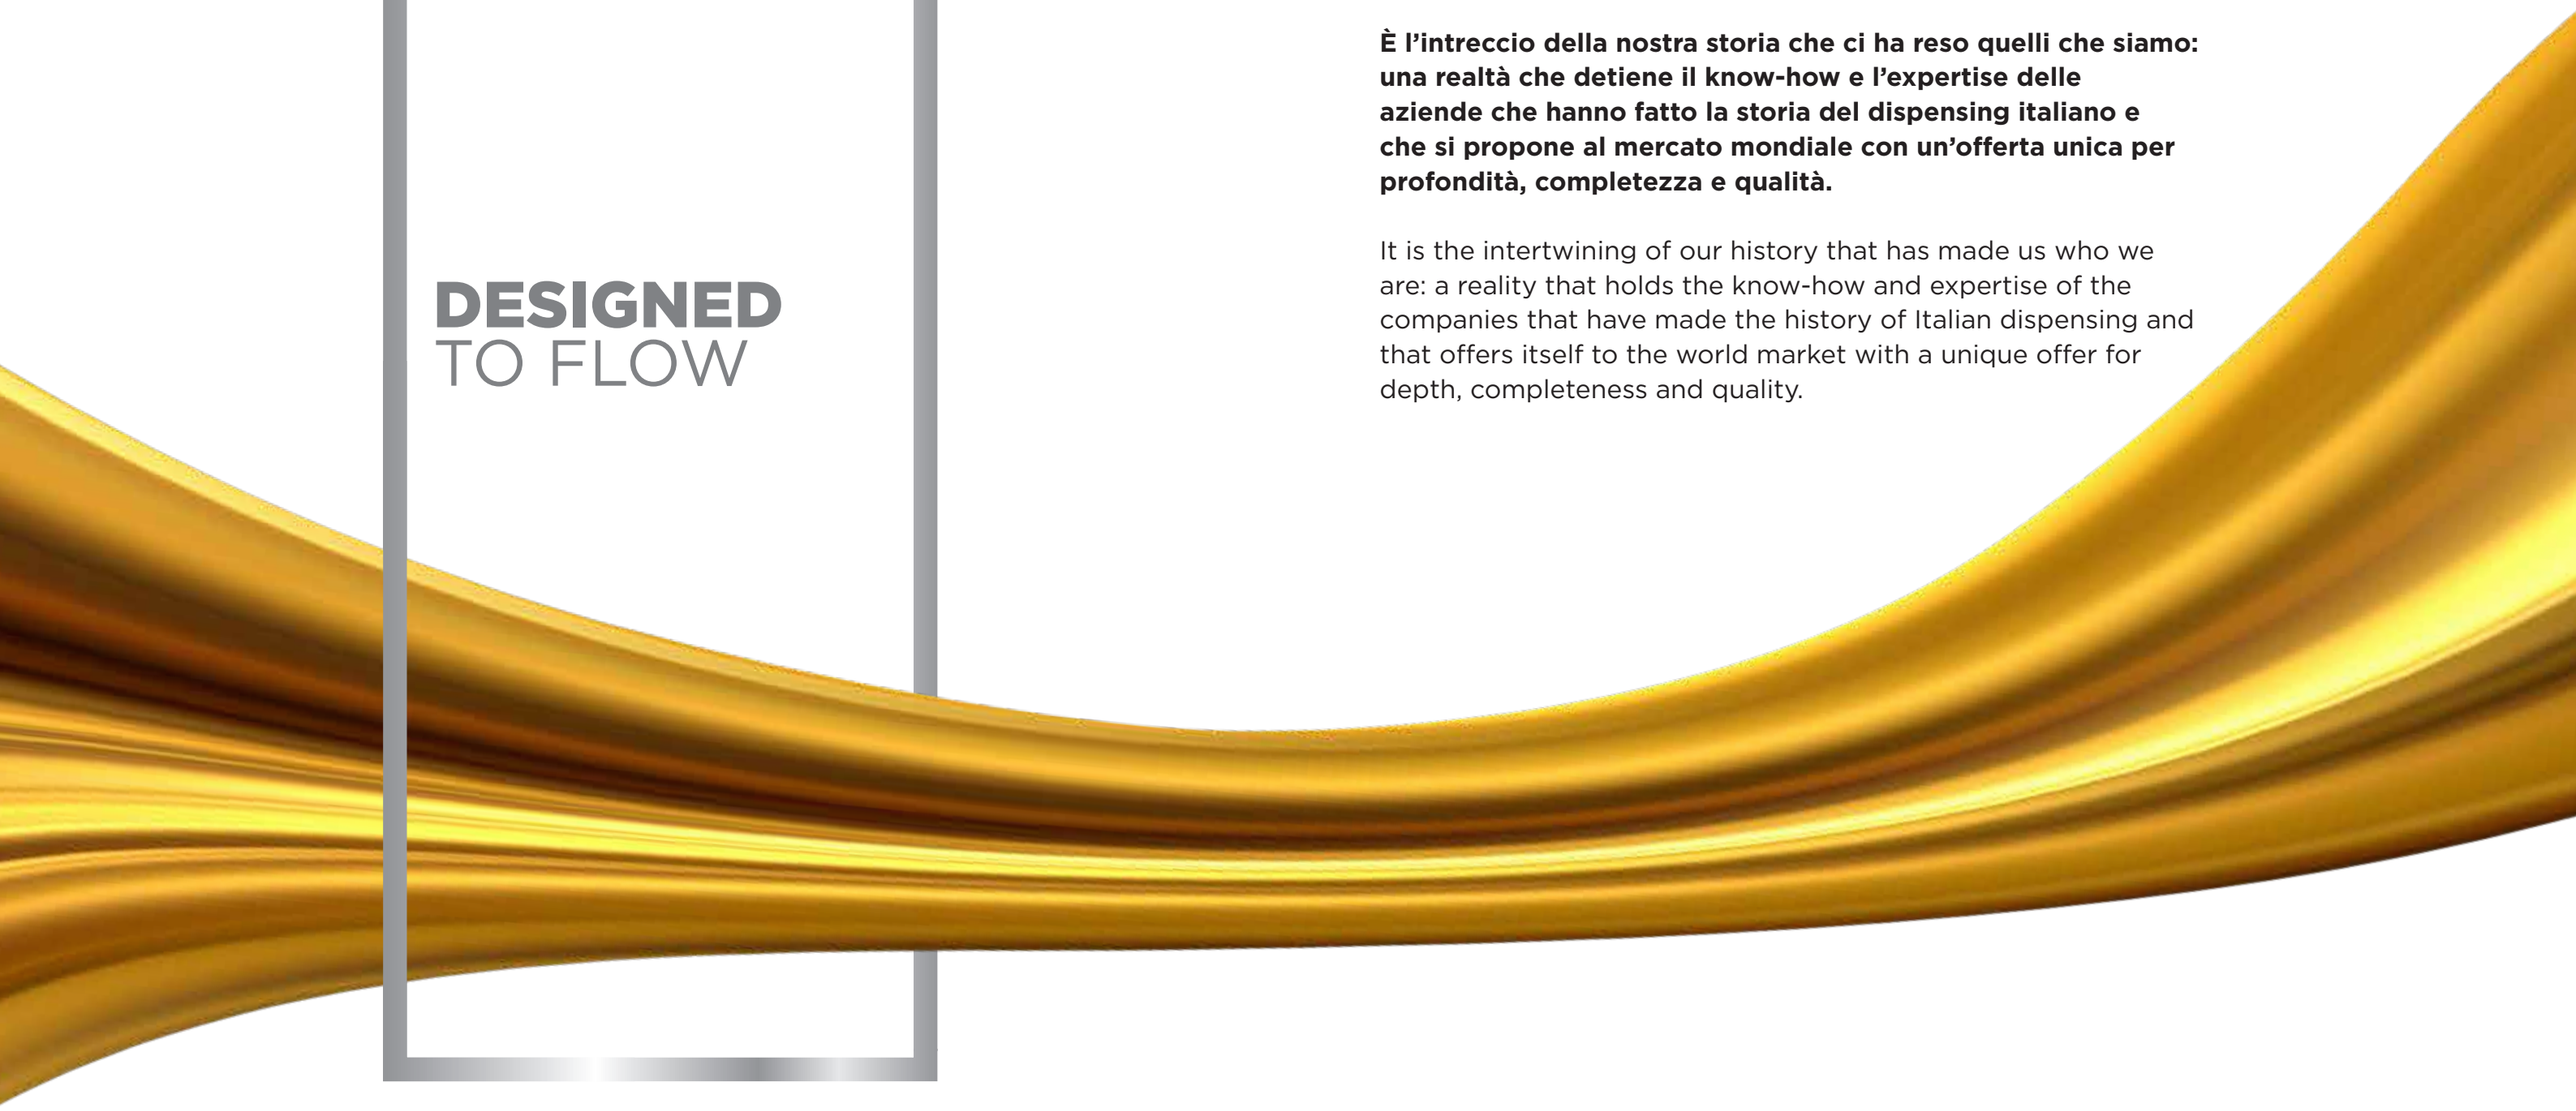

BEVCO nasce nel 2010 dall'unione di due storiche realtà produttrici di sistemi per il beverage: BREWSERVICE, nota per i suoi strumenti di spillatura della birra, e Nuti, player storico nel mercato di macchine per l'erogazione di soft drink. Nel 2017 Bevco incorpora CEM Industries, realtà industriale con un'esperienza trentennale focalizzata principalmente su macchine per l'erogazione di acqua fredda e gasata. Nel 2018 viene costituita Bevco Balcani, nuova unità produttiva con l'obiettivo di garantire una maggiore e più puntuale presenza sui mercati dell'Europa orientale.

BEVCO was founded in 2010 from the union of two historic manufacturers of beverage systems: Brewservice, known for its beer tapping tools, and Nuti, a historic player in the soft drink dispensing machine market. In 2017 Bevco incorporated CEM Industries, an industrial company with thirty years of experience mainly focused on machines for dispensing cold and sparkling water. In 2018 Bevco Balcani was established, a new production unit with the aim of ensuring a greater and more punctual presence on the Eastern European markets.

It is the intertwining of our history that has made us who we are: a reality that holds the know-how and expertise of the companies that have made the history of Italian dispensing and that offers itself to the world market with a unique offer for depth, completeness and quality.

CAMBIARE IL MONDO, GOCCIA DOPO GOCCIA
CHANGING THE WORLD, DROP BY DROP

Abbiamo una missione: garantire una drinking experience a ridotto impatto ambientale. Siamo già in grado di produrre strumenti per l'erogazione di bevande gassate che limitano fortemente le emissioni di CO2, ma la nostra ricerca non si ferma qui. Attraverso il nuovo sistema di isolamento termico della vasca riciclabile al 100%, ISOTECH PLUS, in combinazione con i nuovi componenti ad alta efficienza, abbiamo creato una linea di refrigeratori che garantiscono una resa superiore del 30% rispetto ai sistemi tradizionali, contribuendo così ad abbassare anche i consumi energetici dei locali.

We have a mission: to guarantee a drinking experience with a reduced environmental impact. We are already able to produce tools for the dispensing of carbonated drinks that strongly limit CO2 emissions, but our research does not stop there.
Through the new thermal insulation system of the 100% recyclable tank, ISOTECH PLUS, in combination with the new high efficiency components, we have created a line of chillers that guarantee a 30% higher yield compared to traditional systems, thus helping to lower also the energy consumption of the premises.
